

SCOM Alert Update Connector Pro

Installation Guide

Install Video: <https://www.scom2k7.com/installguide>

Server Requirements:

- The SCOM Alert Update Connector Pro must be installed on a **SCOM 2012 R2, 2016, 1801, 1807 or 2019 Management Server** that has the **Operations Console** and **Web Console** installed.

User Requirements:

- Users require Internet Explorer 9 or above, Chrome, Firefox, Safari or Edge.

Instructions

- 1.) Copy the **SCOMAlertUpdateConnectorPro.msi** file over to the Management Server.
- 2.) Double click on **SCOMAlertUpdateConnectorPro.msi** file.
- 3.) Click **Next**
- 4.) **Read** and **Accept** the License Agreement, then click **Next**
- 5.) On the **Ready to Install** screen click **Install**
- 6.) Click **Yes** on the next screen.
- 7.) After the install finishes the Alert Update Connector Pro Configuration Screen will appear.
- 8.) The configuration screen will automatically populate the Management Server, Operations Manager DB Server, Database Name, and Domain.

Alert Update Connector Pro Configuration
